# Treatment Procedure for JETT Plasma Lift

---

## 1. TAPE Calibration

- Turn device off with power button at display
- Hold „PLAY“ and power button at same time for 3 seconds to reach the „TAPE“ calibration mode. Now you can see changing signs on display
- Close your fist around the twisted part of grounding cable. This way the device recognize the optimal „TAPE value“
- Press „PLAY“ button to store optimal „TAPE value“ to internal memory

# Treatment Procedure for JETT Plasma Lift

---

## 2. JETT Plasma Lift Installation

- Plug in the blue grounding cable
- Plug in the supply cable
- Plug the grounding cable in **moisted** bracelet

Or to the electrode

# Treatment Procedure for JETT Plasma Lift

---

## 2. JETT Plasma Lift Installation

- If an electrode is used place the electrode as close to the treated area as possible
- Screw the chosen tip on
- Plug the device in a power supply

# Treatment Procedure for JETT Plasma Lift

---

## 3. Setting of the Device

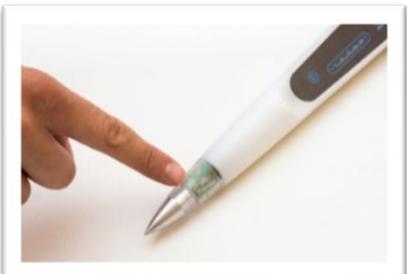

- If message **TAPE** appears on the display, electrode is not applied correctly
- This is how the display looks like if the electrode is applied correctly
- Swipe the number scale with your finger to adjust time
- Touch the left button to adjust the intensity of the treatment. Set the intensity with the number scale
- If you touch the button again, the device starts working (orange light is on).

---

## 4. Warning

- If the orange light on the display is on, the device is already active
- As you work with the device, the transparent part may get heated
- Never touch the metal tip, if the device is active. You might get hurt
- Neither clients nor the operating staff are allowed to wear any accessories during the treatment

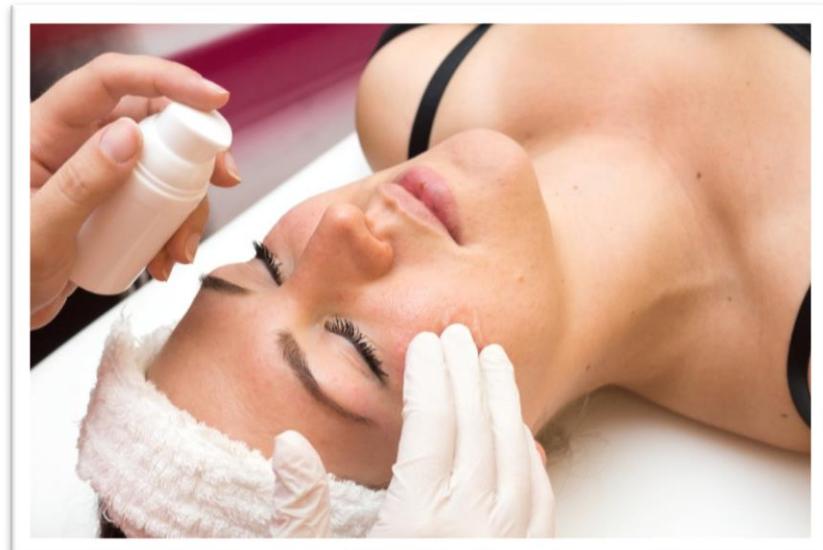

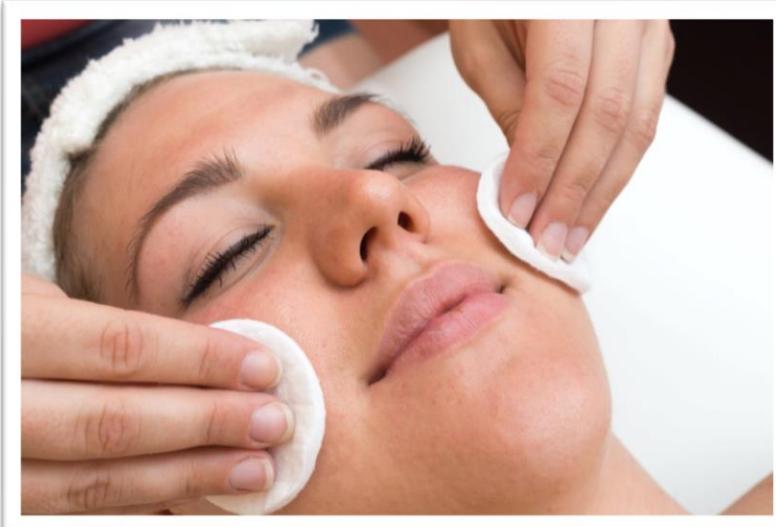

# Treatment Procedure for JETT Plasma Lift

---

## 5. Treatment Procedure

- Clean and dry skin thoroughly
- If a serum is used, apply it on the skin and gently massage it into the skin

# Treatment Procedure for JETT Plasma Lift

## *First stage – Treatment with Flat Tip*

- Apply an indifferent gel
- Divide the face into 6 parts. Each part is treated with a flat tip for 5 minutes

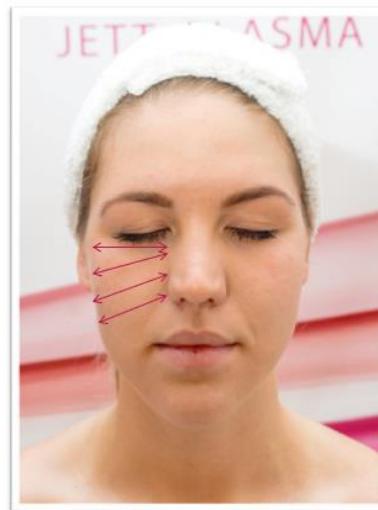

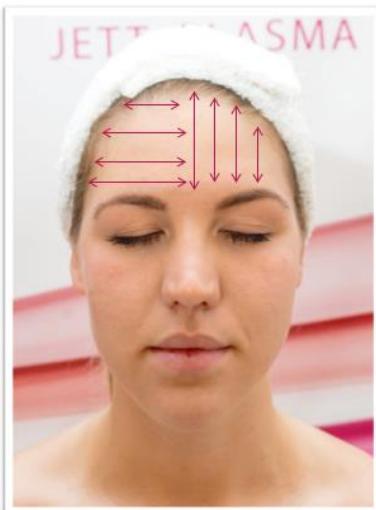

# Treatment Procedure for JETT Plasma Lift

---

## *Movements for the Treatment with Flat Tip*

- During the treatment, the tip is put on the skin first and then pressed ON button
- The flat tip should be gently pressed against the skin. However, the client must be comfortable with the treatment
- Do not get to the hair area with the tip. Hair might get burned

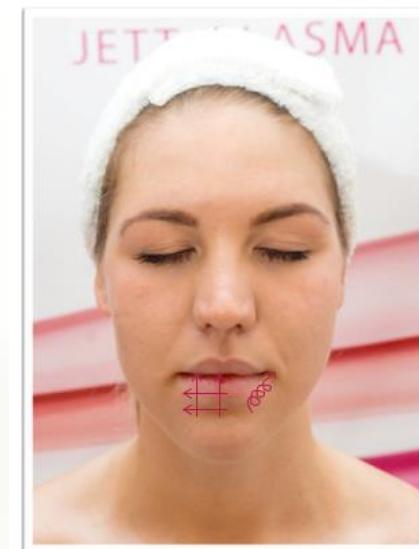

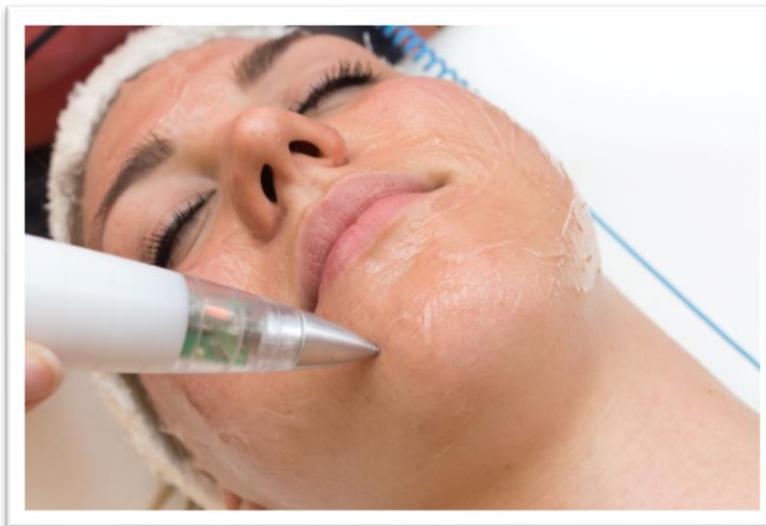

# Treatment Procedure for JETT Plasma Lift

---

## *Second Stage - Treatment with 5 mm tip*

- Do not press against the skin during the treatment. The touch with the tip is light and the client feels comfortable
- The treatment time with the 5 mm tip should be 10-15 minutes for the whole face
- Make the tiniest possible moves on the whole face

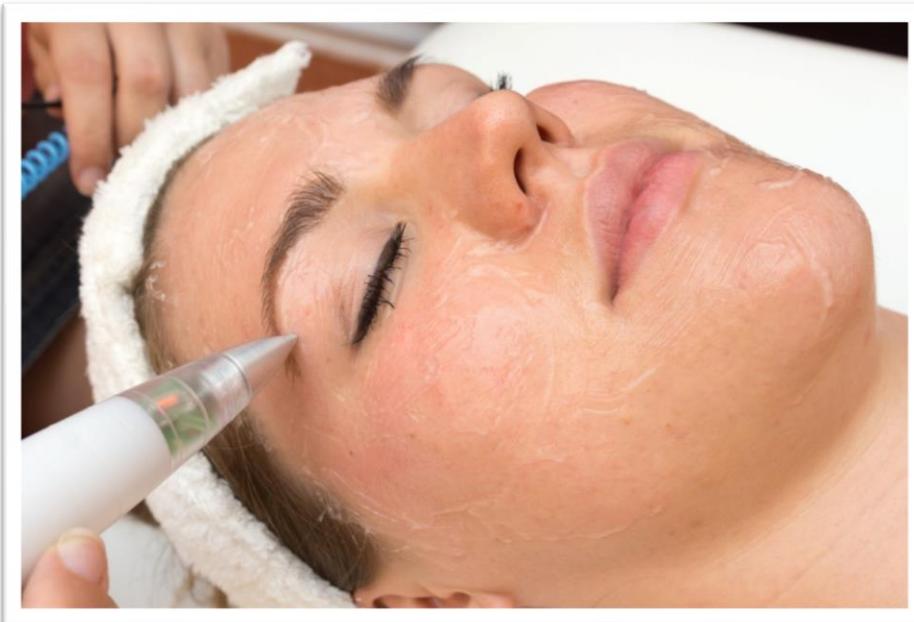

# Treatment Procedure for JETT Plasma Lift

---

## *Third Stage -Treatment with 3 mm tip*

- The 3 mm tip is used mainly to treat the area around eyes
- Do not press against the tip during the treatment

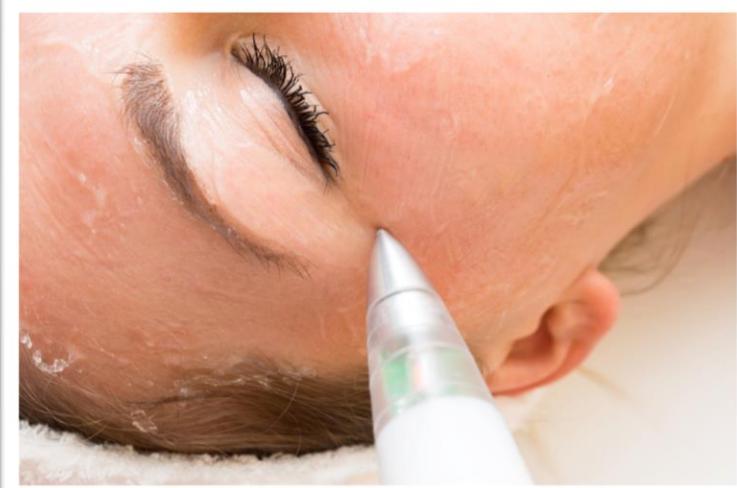

# Treatment Procedure for JETT Plasma Lift

---

## *Fourth Stage – Cone Tip*

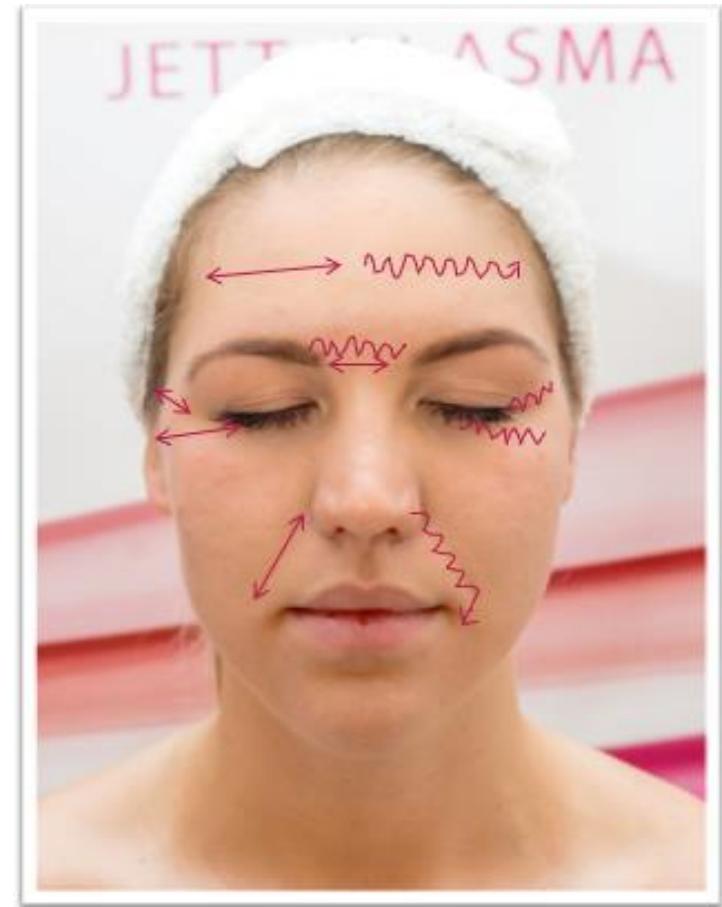

- The pointed tip is used to treat wrinkles
- Keep the device over the skin to see the plasma discharge – it is also called as scanning.

# Treatment Procedure for JETT Plasma Lift

## *Movements for the Treatment with Cone Tip*

- Move **back and forth** above the wrinkle for 1 – 2 minutes depending on how deep is the wrinkle.
- A **zig-zag** move, as if we wanted to sew the wrinkle, for 1 – 2 minutes depending on how deep is the wrinkle.
- The point must be always in a right angle to the treated area and do not touch the client during the treatment.

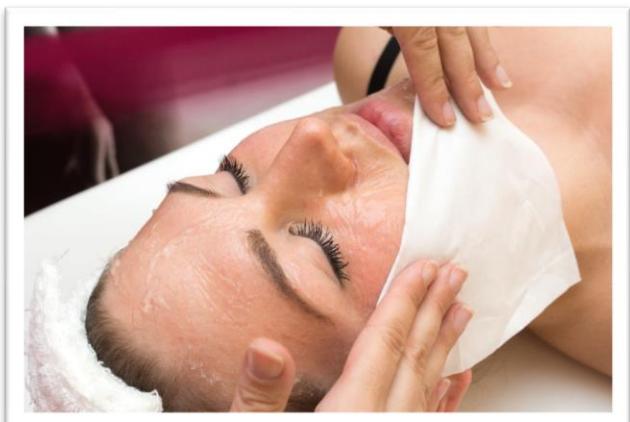

# Treatment Procedure for JETT Plasma Lift

---

## *6. The End of the Treatment*

- Clean the skin after the treatment
- You can apply a face mask at the end of the treatment.
- The Jett Plasma Lift treatment can be combined with other types of treatments

# Treatment Procedure for JETT Plasma Lift

## *Frequency of Treatments (Recommendation)*

### **BASIC TREATMENT**

6-10 sessions  
1 -2 x a week

### **FOLLOWING TREATMENTS**

4 sessions - once every 2 weeks

### **FOLLOWING TREATMENTS**

4 sessions – once every 3 weeks

### **ONCE A MONTH**

# Treatment Procedure for JETT Plasma Lift

---

## *Body Treatment*

- The treatment procedure is the same as for the face treatment
